

## Intercom react native setup

```
1 yarn add @intercom/intercom-react-native
```

Place this in application entry file index.js

```
1 import Intercom from '@intercom/intercom-react-native';
```

```
1 useEffect(() => {
2   requestUserPermissions(); //ignore this line
3   getPOToken(); //ignore this line
4   Intercom.setLauncherVisibility('GONE');
5 }, []);
```

2) Upon login  
Use user's email and password from token to log user in.

```
1 import Intercom, {
2   IntercomEvents,
3   Space,
4   Visibility,
5   IntercomContent,
6 } from '@intercom/intercom-react-native';
```

```
1 const loginIntercom = () => {
2   Intercom.loginUserWithUserAttributes({
3     email: user?.email,
4     userId: user?.id,
5   });
6 };
7 useEffect(() => {
8   loginIntercom();
9 }, []);
```

3) Then the file from where you want to start FAQ SDK place this

```
1 import Intercom from '@intercom/intercom-react-native';
```

```
1 <TouchableOpacity
2   activeOpacity={0.8}
3   style={styles.touchableCardContainer}
4   onPress={() => {
5     Intercom.present();
6   }}
7 />
8 <Card style={{ padding: 10, paddingVertical: 20 }}
9 />
10 <Image source={require('@react-native-community/assets')}
11   style={styles.cardImage}
12 />
13 <Text style={styles.tabbarText}>Support & FAQ</Text>
14 </Card>
15 </TouchableOpacity>
```
