

Intercom react native setup

```
1 yarn add @intercom/intercom-react-native
```

Place this in application entry file index.jsx

```
1 import Intercom from '@intercom/intercom-react-native';
```

```
1 useEffect(() => {  
2   requestUserPermissions(); //ignore this line  
3   getPOToken(); //ignore this line  
4  
5   Intercom.setLauncherVisibility('GONE');  
6 }, []);
```

2) Upon login

Use user's email and password from token to log user in.

```
1 import Intercom, {  
2   IntercomEvents,  
3   Space,  
4   Visibility,  
5   IntercomContent,  
6 } from '@intercom/intercom-react-native';
```

```
1 const loginIntercom = () => {  
2   Intercom.loginUserWithUserAttributes({  
3     email: user?.email,  
4     userId: user?.id,  
5   });  
6 };  
7  
8 useEffect(() => {  
9   loginIntercom();  
10 }, []);
```

3) Then the file from where you want to start FAQ SDK place this

```
1 import Intercom from '@intercom/intercom-react-native';
```

```
1 <TouchableOpacity  
2   activeOpacity={0.8}  
3   style={styles.touchableCardContainer}  
4   onPress={() => {  
5     Intercom.present();  
6   }}  
7 >  
8   <Card style={{ padding: 10, paddingVertical: 20 }}>  
9     <Image  
10       source={IMAGES.ITEMS_FAQ_H_SUPPORT}  
11       style={styles.cardImage}/>  
12     </>  
13     <Text style={styles.tabItemText}>Support & FAQ</Text>  
14   </Card>  
15 </TouchableOpacity>
```
